STAFF REPORT

To: Mayor and Members of the Town Council
From: Office of the Director of Public Works
Subject: Discussion of CIP Prioritization
Reviewed By: 

BACKGROUND

At the Town Council/Staff Retreat on April 1, 2016, staff presented a proposed framework for capital project planning that would provide for a systematic approach to the planning, budgeting and financing of capital projects. It consists of the following steps:

- Development of a Project Portfolio
- Ranking of projects within the portfolio based on a set of established criteria
- Approval of prioritized Project Portfolio and integration into annual budget process
- Review and adjustments to Project Portfolio on annual basis and/or as new projects are identified

Council indicated its interest in pursuing development of this planning process for its obvious benefit as a tool for budgeting, as well as to make the process more open and accountable. Council also supported the formation of a Council ad hoc committee to assist staff in developing this planning tool.

At the July 20, 2016 Council meeting, Council appointed Mayor Tollini and Councilmember Fredericks to serve on an ad hoc Committee to establish the criteria for ranking proposed projects.

Staff had previously reached out to other jurisdictions and asked if they had a prioritization methodology. The County has a prioritization methodology and seems to use their method with the greatest success. The County's methodology includes 8 criteria, weighted, each of which can be scored between 1 and 5 or 6.

San Rafael and Sausalito have methodologies based on the County's. San Rafael's is a simplified version of the County's method and includes no weighting. Staff's opinion is that it did not properly differentiate priorities. Sausalito indicated their methodology is not differentiating in a way that helps their Council.

Staff did look beyond Marin County for other CIP ranking methodologies, but believes the County's combines both simplicity and useful criteria that effectively differentiates between projects.

ANALYSIS

Staff met with the ad hoc Committee and presented the County's methodology as a draft. Criteria were changed, new weights were established and scoring changed to reflect the needs of the Town. Staff presented the new methodology back to the ad hoc Committee, and further refinements occurred via e-mail. This resulted in the proposed methodology detailed in **Exhibit 1**.

We have provided a blank scoring sheet template for Council review as **Exhibit 2**

Staff selected 24 projects for a trial run using the methodology and had scoring done by five staff members without consultation or descriptions of the projects. There was approximately 75% agreement on what projects belonged in the top third the middle third and the bottom third. Relying on the three staff members with the best knowledge of the Town and individual projects increased this slightly. We have provided a ranking sheet for these 24 projects showing the rank by the based on the average (mean) scores provided by staff. We have included the rank based on the median scores as well for comparison. Comparison of the mean rank and the median rank shows where there was some disagreement in the scoring. The summary data from staff's 'trial' run as **Exhibit 3**.

RECOMMENDATION

Staff recommends that the Town Council:

1. Receive the Staff Report
2. Discuss and finalize the ranking criteria
3. Direct Staff regarding next steps in this planning process
