TSUNAMI ADVISORY

Tiburon and the western USA are under a tsunami advisory due to a volcanic eruption in the Pacific.

Evacuate beaches, low lying areas ocean side and bay side. Stay out of coastal waters. The tsunami impact is expected to be like an extreme King tide cycling repeatedly for a few hours. Heights are expected to be 0.6 - 0.9 meters (2 - 3 feet). Initial impact should be 8:10 AM. Greatest impacts likely to be in hour or two after initial impact. Should not impact residential areas which are not impacted by bad King Tides.
