## A Word from the Mayor

Hello Everyone!

We have a lot to look forward to in Tiburon these next few weeks and I hope you can all join us.

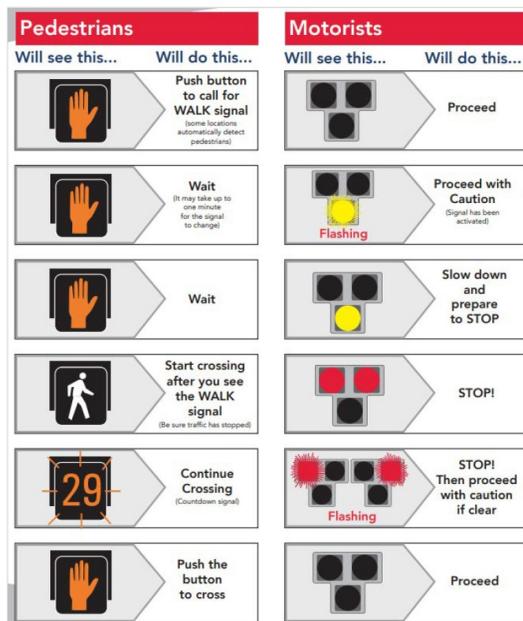

On April 14, 2025, I encourage you to join our Diversity Inclusion Task Force (DITF) for Nowruz on April 19, 2025 from 3:00 to 5:00 p.m. on Lower Main Street. Our DITF also would like you to join us on Saturday, May 17, 2025 for our AAPI Festival at Zelinsky Park. If you have events you would like to suggest to DITF, please send them to us as described below. Our DITF has been so successful hosting community events that our residents and visitors have loved attending and spreading cultural awareness, as well as diversifying our Town staff and Police Department. We would love your participation!

Also, next month please join us at Tiburon's Earth Day celebration on April 27th! When we look towards our future here in Tiburon, we are very focused on reducing our GHG emissions and implementing our Climate Action Plan. Please join us at the May 21 Town Council meeting for a report of our CAP.

I hope that you have a fantastic week, and please reach out to me if I can be of service.

## HAWK Signal Installed at Ned's Way & Tiburon Boulevard

Caltrans has now completed its repair work at the Ned's & Tiburon Boulevard intersection.

The crosswalk at Ned's Way is now an enhanced crosswalk using a HAWK (High-Intensity Activated CrossWalk) signal. HAWK signals are designed to help pedestrians cross busy streets more safely than traditional crosswalks.

This is the second HAWK signal in town - the signal at Stewart Drive and Tiburon Boulevard was installed last year.

### How to Use a HAWK Signal

For pedestrians, HAWK signals operate like any other traditional crosswalk. When you are ready to cross, press the button, and WAIT for the signal on the

opposite side of the street to direct you to cross. It may take up to a minute for the signal to change.

For motorists, the signal appears differently than other crosswalk lights. Once the signal is triggered by the pedestrian, the HAWK will go through a series of red and yellow sequences requiring motorists to slow down before signaling a solid red STOP light. It may take up to a minute for the HAWK to signal motorists to STOP.

Once triggered, the HAWK will:

**Flash Yellow** – Proceed cautiously and slow down; a pedestrian has triggered the beacon

**Solid Yellow** – Prepare to stop

**Solid Red** – STOP

## Class-2 E-Bike Ordinance Update Being Considered

On Wednesday, April 2 at 6:30 p.m., the Tiburon Town Council will hold a public hearing to consider adoption of ordinances limiting the age of class-2 e-bike riders to 16 and older and requiring all class-2 e-bike riders to wear a helmet. Class-2 e-bikes are operated with a throttle and do not have pedal assist. Class-1 e-bikes, which are pedal-assisted and do not have a throttle, would remain operable for youth under 16.

From 2019 to 2022, 911 calls in Marin related to all bikes rose 110% among school-aged youth. In 2023, Marin County Public Health data showed the e-bike accident rate in Marin for individuals aged 10 to 15 is five times higher than for all other age groups. This data led Assemblymember Damon Connolly to author [AB 1778](#), which allows municipalities in Marin County to adopt restrictions to improve e-bike safety.
