Project Description

Bel Aire Play Area is a 0.64-acre mini park located in the center of a residential block surrounded by single-family lots, connecting Karen Way to the north and Claire Way to the south. The Town of Tiburon is developing a conceptual design to guide future renovations of the park. Informed by community surveys from the 2025 "Tiburon Parks, Recreation & Open Space Master Plan," the design explores nature-based solutions for improved accessibility, passive recreational amenities, and low-maintenance landscaping and drainage that preserve the tranquil experience of the site. This early design is intended to reflect the Town and community's wants and needs. No final decisions have been made, and your feedback is important in helping shape the future of the park.
