Landscape Architecture & Planning

Location

Project Narrative

The Tiburon Richardson Bay Sanitation Ponds site presents an opportunity to enhance the Tiburon waterfront with diverse recreational activities. The Master Plan and POST Subcommittees have identified a variety of potential features for the site. The proposed plan includes a basketball court with terraced seating, two sand volleyball courts, a shaded picnic area, relocation of the primary bicycle route to provide a safer connection to the adjacent field and waterfront, and sustainable habitat planting. Additional recreational and community amenities will be provided elsewhere along the shoreline through future park improvements.
